
Job Identification

Job Title: Maintenance Millwright
Division: Bailey Metal Processing Limited
Reports to: Plant Manager

Job Purpose Summary

The main purpose of this position is to ensure that all Bailey equipment and facilities are repaired and well maintained while meeting scheduling priorities, safety, quality, productivity and reliability requirements.

This requires coordination and reporting; troubleshooting; preventive maintenance; addressing safety issues; equipment mobilization planning and installation.

This position significantly contributes to the overall production function of Bailey Metal Processing. If the equipment is not operating safely, effectively and efficiently, it may result in loss of production or distribution of products there by impacting on customer satisfaction. It may also result in costly workplace accident, impacting employee relationship. This will have a significant impact on Bailey business and profits.
